

# 3250SS

## THE GROUND HOG FAMILY

The 3250SS scraper is designed for multi-terrain loaders. All the best features of a compact scraper packed into the maneuverability of a skid steer. There is even an optional laser mast attachment to achieve greater precision.

# AN ATTACHMENT FOR PROFITABILITY

Your compact track loader just got a lot more valuable. A first of its kind, the 3250SS combines the efficiencies of an industrial grade scraper and dozer blade in a single design. No matter what your site demands, the 3250 series can cut, carry, and dump up to 2.5m<sup>3</sup>. while the integrated leveling blade handles final grade in a single pass.

Not only is this the most profitable attachment for your skid steer, the simplicity of the hydraulics make it easy to plug-and-play. The 3250SS also shares the same industrial pedigree as our full-sized scrapers – ensuring decades of uptime.

**3250SS**  
2.5m<sup>3</sup> - 80 +HP. - Dump - Skid Steer

# 3250SS

## HYDRAULIC OPERATION

The 3250SS scraper is simple to operate, while still out cycling an 80+ horsepower dozer. The entire Bowl moves within the mainframe by means of a heavy-duty actuating frame and linkage system. Allowing the operator complete blade control with one hydraulic remote.

## ATTACHMENT PLATE

This 2.5m<sup>3</sup> scraper features a universal mount skid steer plate. Allowing you to attach right to your power unit without any issues. The design is simple and with articulation of the guide pipe – pivoting on double sealed spherical bearing – operators will be in control and have less maintenance.

## BOWL

The bowl is formed from high grade steel with a top lip to help reduce boil-over. Performing the whole process of cut, carry, and dump, this bowl is built to last. Engineered for grading, stripping sod, and landscape projects. With a 64 degree dump angle, you can place dirt right where it's needed and finish-grade in no time.

## FRAME

All Ashland frames consist of an amalgamation of plate steel and tubing. Our small-sized units have added heft where it's needed most. Multiple pieces are adjustable so the machine can be tuned to your exact needs.

## STRONGER STEEL

Ashland not only increased the thickness of steel but improved the yield strength by nearly 30%. Making this machine just as durable as the rest of the Ashland line. Including our bolt-on style blades for ease of maintenance. You can put this scraper in the toughest conditions and be confident doing so year after year.

## WHEEL ASSEMBLY

With the capacity of a small wheel loader, the 3250SS transforms your skid steer into a mass mover. Standard 11 x 15 tires, heavy duty spindles, and high capacity 6-bolt hubs allow you to smoothly haul loads at speed over greater distance. And with a single-point caster beam, cut and carry is steady. Even the wheels' pivot 360 degrees, making sure you don't sacrifice maneuverability.

Ashland Industries understands that overhead is a necessary evil for any construction business. Equipment worth your investment ought to provide a return to you. That's why we created the 3250SS skid steer scraper. It acts as a loader, dump truck, dozer, and grader, with all the benefits of a compact track loader.

## SPECIFICATIONS

Capacity, Heaped (ISO 6485):	2.5m <sup>3</sup>
Required HP:	80+ HP
Width of Cut:	2082mm
Apron Clearance:	266.7mm
Lift Cylinder (2):	3.5" x 16" Stroke
Blade Set (3):	Corners, Center
Leveling Blade (2):	Standard
Laser Mast:	Optional
Tires (Std. Rear (2)):	11 x 15
Overall Width:	2.57m
Overall Length:	3.3m
Overall Height:	1.27m
Dump Angle:	64°
Weight (Std. Bias Tire):	1769kgs
