K-TEC IN HISTORY

The first K-Tec Earthmover was built in 2000 by an earthmoving contractor in North America wanting to create a durable, lightweight earthmoving unit that could perform without the need for excessive horsepower and fuel. By 2004, K-Tec had hit full-scale production and had established relationships with key equipment dealers in North America. Since then, K-Tec scrapers and land levellers continue to operate in some of the most challenging terrain across the world: Saudi Arabia, Poland, Australia, Canada and the USA. Today, K-Tec is actively expanding into markets in Africa, Russia, Holland, South America and Central America.

Today, K-Tec Earthmovers are being produced faster and more efficiently than ever, thanks to a new state of the art manufacturing facility in North America. More than 925 K-Tec scrapers have been manufactured – all of which are still in workable condition today. In most dirt conditions, we anticipate a minimum of around 10,000 hours before needing to replace the liners on our scrapers.

DOM Distribution acquired exclusive distributorship of K-Tec Earthmovers Inc. in Australia in 2014, by which time K-Tecs had been working at jobs across Australia for almost a decade. Today, DOM Distribution is a top performer in K-Tec's global network of suppliers. DOM carries a large range of earthmoving scraper and precision levelling machines with models available for immediate purchase and stock a complete range of hitches and parts for direct despatch to our many K-Tec clients and operators Australia-wide. Working in tandem with our plant hire and finance divisions, DOM Distribution can offer a number of power unit and earthmoving equipment rental and rent-to-buy options.

AUSTRALIAN CAPABILITIES

NEW MACHINERY SALES

DOM Distribution stocks a comprehensive range of new K-Tec earthmoving scraper buckets and precision levelling machinery models. DOM Distribution's K-Tec machinery warehouse stocks an extensive selection of hitches, parts and remote support kits ready for immediate despatch to anywhere in Australia. Our after-sales service extends to on-site operational training, maintenance and support.

USED MACHINERY SALES

If you're looking to buy a quality piece of earthmoving equipment without the capital investment of purchasing new, consider purchasing a trade, ex-demo or ex-rental K-Tec. DOM Distribution is constantly turning over its K-Tec rental fleet which means there are well maintained late model, low-hour machines for sale at a price to suit almost any budget.

RENTAL EQUIPMENT

Take your productivity to the next level with a quality K-Tec earthmoving solution from DOM Distribution's plant hire division. Our rental fleet is modern, extensive and backed by our team of trained service professionals to ensure you get the job done on budget and on time. DOM Distribution offers numerous product lines to complement our rental fleet of K-Tec Earthmovers including – articulated agricultural tractors and dump trucks.

UNPRECEDENTED DEMAND

Demand for K-Tec earthmoving machinery in Australia has been unprecedented for DOM over the past 18 months. Large-scale earthmovers in the mining, civil and commercial construction and agricultural industries are recognising the primary capability of K-Tec Earthmovers; they move more dirt for less money.

The beauty of a K-Tec lies in its very low maintenance design, ensuring dependability and significantly reducing downtime. Only five total grease points and greaseless bushings allow up to 1200 operating hours before replacement for minimal downtime and maximum productivity. Pulled singly or in tandem, K-Tec scrapers have quick cycle times, great floatation, and load easily so that your operators are productive and moving the most cubic metres per litre of fuel. Even in the rigorous construction and mining industries, K-Tec's average annual warranty claim rate is less than 1%.

Adding to the appeal is the versatility in range of K-Tec scraper models of on offer. There is a K-Tec Earthmover to suit every application. K-Tec scrapers are compatible with a wide range articulated dump trucks or articulated tractors and can be configured to work in tandem as high volume earthmoving trains. DOM Distribution carries the comprehensive range of K-Tec scrapers, ranging from 21.4m³ to 48.2m³ heaped capacities.

In Australia today, DOM Distribution supplies K-Tec Earthmovers to a multitude of clients undertaking projects in the following industries and applications (including but not limited to):

MINING

- Reclamation and Land Rehabilitation
- Stripping Overburden
- Resource Extraction
- Haul Road Construction and Levelling

AGRICULTURE

- Stripping Topsoil
- Precision Ditch Drainage
- Dam & Water Storage Construction
- Bankless Irrigation
- Levees & Flood Channelling

SITE PREPARATION

- Residential Housing Developments
- Waterfront Living Developments
- Cattle Feedlots
- Airport Runway Expansions
- Coastal Land Reclamation

ROAD WORKS

- Suburban Residential Roads
- Rural Access/Service Roads
- Highway Extensions/Repair

ARTICULATED DUMP TRUCK POWER UNITS

RETURN ON INVESTMENT

**MOVE UP TO 55M³
WITH ONE POWER UNIT**

APPLICATIONS

- Bulk Material Handling
- Land Forming
- Maintaining Haul Roads
- Precision Finish Work

1228 ADT

VERSATILITY AT ITS FINEST

The K-Tec 1228 has versatility, making it K-Tec's most popular models. The hitching system mounts onto a 25 or 30-Tonne articulated dump truck chassis, making the K-Tec 1228 ADT perfect for small jobsite applications.

HEAPED CAPACITY (ISO)	MAX LOADING RATING	OVERALL LENGTH
21.4 M³	30,844 KG	10.55 M
STRUCK CAPACITY	CUTTING WIDTH	SHIPPING WEIGHT
14.1 M³	3.66 M	14,388 KG

1237 ADT

MOST POPULAR ADT

The K-Tec 1237 ADT is designed for self loading with a 40-tonne, 400+ horsepower rock truck. The 1237 ADT offers more power to the ground with the functionality from an existing rock truck unit. It features fast hydraulics, a smooth ride, and joystick.

HEAPED CAPACITY (ISO)	MAX LOADING RATING	OVERALL LENGTH
27.5 M³	39,235 KG	11.13 M
STRUCK CAPACITY	CUTTING WIDTH	SHIPPING WEIGHT
15.5 M³	4.27 M	18,390 KG

1237 ADT TRAIN

DOUBLE CAPACITY ADT

The K-Tec 1237 ADT Train is designed for self loading two scrapers with a single 40-tonne, 400+ horsepower rock truck. The 1237 ADT Train provides a tandem heaped capacity of 55 cubic meters.

HEAPED CAPACITY (ISO)	MAX LOADING RATING	OVERALL LENGTH
55 M³	78,471 KG	11.13 M, 11.13 M
STRUCK CAPACITY	CUTTING WIDTH	SHIPPING WEIGHT
30.9 M³	4.27 M	18,885 KG, 18,390 KG

1243 ADT

MASS EARTHMOVING ADT

The K-Tec 1243 ADT is designed for self-loading with a 40-tonne, 450+ horsepower rock truck. The 1243 ADT utilizes K-Tec's proprietary gooseneck hitching system, and has a PSI strength which is significantly greater than many competing scrapers.

HEAPED CAPACITY (ISO)	MAX LOADING RATING	OVERALL LENGTH
32.8 M³	46,810 KG	12.25 M
STRUCK CAPACITY	CUTTING WIDTH	SHIPPING WEIGHT
19.6 M³	4.27 M	22,430 KG

1263 ADT

MASSIVE DIRT MOVING PROJECTS

The K-Tec 1263 ADT is the world's largest dirt moving scraper. It is designed for push-loading, while being pulled with a 40-tonne, 450+ horsepower rock truck power unit. The 1263 ADT has a bolt-together design which enables overseas shipping and ease of maintenance.

HEAPED CAPACITY (ISO)	MAX LOADING RATING	OVERALL LENGTH
48.6 M³	68,583 KG	13.4 M
STRUCK CAPACITY	CUTTING WIDTH	SHIPPING WEIGHT
31.6 M³	4.27 M	27,699 KG

DIRECT MOUNT SERIES SCRAPERS

RETURN ON INVESTMENT

**MOVE UP TO 50M³
WITH ONE POWER UNIT**

APPLICATIONS

- Bulk Material Handling
- Land Forming
- Maintaining Haul Roads
- Precision Finish Work

DIRECT MOUNT POWER UNITS

LAND LEVELLERS

LAND LEVELLING MADE EASY

Our line of heavy-duty box scrapers thrive in the construction and agriculture industries. Designed for maintaining haul roads, precision site levelling, and field drainage; the Flex models enable the folding back of the hitchpole for legal road width to transport between jobsites.

CAPACITY (ISO)
UP TO 16M³

RECOMMENDED POWER
350HP+ / 260KW+

CUTTING WIDTH
3.5M TO 8.5M

1228

LGP UNIT

K-Tec 1228 has versatility, making it one of K-Tec's most popular models. The 1228 "Sand Shark" is designed to load well in all conditions and specializes in low ground pressure projects, and is proficient in sandy soil.

HEAPED CAPACITY (ISO)
21.4 M³

MAX LOADING RATING
30,844 KG

OVERALL LENGTH
11.15 M

STRUCK CAPACITY
14.1 M³

CUTTING WIDTH
3.66 M

SHIPPING WEIGHT
13,310 KG

1233_{SS}

MOST POPULAR

The K-Tec 1233 is the most popular model in the fleet. This multipurpose machine is a powerful worker in any soil condition with unmatched fuel efficiency and an amazing loading speed.

HEAPED CAPACITY (ISO)
25.2 M³

MAX LOADING RATING
36,287 KG

OVERALL LENGTH
11.7 M

STRUCK CAPACITY
14.5 M³

CUTTING WIDTH
4.27 M

SHIPPING WEIGHT
16,875 KG

1233_{TRAIN}

DOUBLE CAPACITY

The multipurpose K-Tec 1233 Train is an efficient worker in any soil condition with productive cycles. The 1233 Train provides a tandem heaped capacity in excess of 50 cubic meters.

HEAPED CAPACITY (ISO)
50.4 M³

MAX LOADING RATING
72,574 KG

OVERALL LENGTH
11.7 M, 11.2 M

STRUCK CAPACITY
29 M³

CUTTING WIDTH
4.27 M

SHIPPING WEIGHT
17,123 KG, 17,538 KG

WATER CART

INCREASED FUNCTIONALITY

Handy conversion kit quickly and easily transforms the K-Tec 1233 and 1237 models into a fast and efficient mobile water cartage and distribution unit. Can be customised to suit a variety of earthmoving and agricultural applications.

VOLUME
27,000 L

OPTIONAL
**SIDE FILL / TOP FILL
DRIBBLE BAR / CANNON
BAFFLE SYSTEM**

REMOTE SUPPORT KIT

MINIMISE DOWN TIME

DOM's heavy duty, weather-proof, custom remote support kit utilises on-site support parts to minimise maintenance downtime. Three options are available to suit operators in mining, construction and agricultural applications.
